

*Choosing to live out the Concept of "Sacred Sisterhood is the Key"*

The Human is *Royal= magnificent- of the excellent kind. Sacred=inborn or natural purpose)*

*Updated & edited by Dr. Chisulo Akono Ajanaku*

"Sacred Sisterhood is the Key" is a mental concept through which men and women can consciously accept to grow out or let go of normal, acceptable beliefs, behaviors and actions taught and passed on from generation to generation by care givers. It allows individuals to move out of living by the same life script and the same mental circumstances as the ancestors. Ancestors who lived and/or emancipated from the plantations of America, without a debriefing or without directions, nor did they know who they were as Homo sapiens or in fact as a group of people. The concept of "Sacred Sisterhood is the key" is the mental medium for freedom from this ill-timed past. And the vehicle to instill a conscious and articulate understanding of the complexities of constructive social interaction with others as a free, responsible adult, equal in all essential respects to all others, and while subject to the process of socialization. This mental concept offers what's necessary to assimilate new ideas and other concepts. Sacred Sisterhood is the key to freedom, change, evolution and equality in America

The concept "Sacred Sisterhood is the Key" conceived by Dr. Nkosi Ajanaku, Esq. in 1969. Dr. Nkosi recognized the need for females and males to come together as one whole person (Human), especially to have a meeting of the minds about how the children are reared, how males & females relate in social relationships, dropping the traditional dating and marital relationship; and doing whatever each person wants to do without thinking about how it impacts on the children. He saw the need to get out of the (traditional relationship man on one woman) slave cabin relationships because they are harmful to females and children.

All of the traditional relationships built on a backward foundation (no rights for women, slavery: and emancipation), based on sex, survival, absent of mental mindset and purpose for all. The results of these detrimental relationships; today boys & men wear their pants below their ass and abuse women/girls by their words, thoughts and actions. Also, girls and women wear tight body clothes that display as much of their sex and curves as possible. Men/boys & women/ girls are attracting unwanted attention that reveals absent of mental mindset and purpose for all. Today, majority of men and the women are supporting the script; consumers, supporters of the status quote, workers, baby producers for the work force, and seekers of sexual pleasure and fulfillment. There is a way out of this script, life pattern and behavior.

The way out is to learn, make application, employ and live out the new concept "Sacred Sisterhood is the Key." Sacred Sisterhood is the Key requires that each person arrive at a cognitive awareness that they are naturally equal in all essential aspects and that they are a Human. And the truth of equality is seeing oneself as a whole person, a whole person within the Human family on earth and essentially equal to all other Humans on earth. Finally, it is to know for oneself "I am a whole person within the Human family on earth, essential, equal to all humans throughout the World with only natural differences and cultural differences. Further, Sacred Sisterhood is the key to each female and male choosing to practice plural to break the legacy of our mothers, grandmothers and fathers and grandfathers.

Sacred sisterhood is the key to this possibility because she gives birth and rears the majority of babies in the world. She is the key to convey to the baby that it is a sacred royal birth, with the potentiality: being imaginative; think new thoughts; create new perceptions and perspectives; reflect on thoughts; dream new

ideas; gather new facts; improve on or discard old things; and create language. Nature has given the female everything to nurture the babies and nurture them to live together as essentially equals. The female will teach a new truth about the babies birth potentiality of being imaginative; to think new thoughts; create new perceptions and perspectives; reflect on thoughts; dream new ideas; gather new facts; improve on and/or discard old things; and create language. With the new truth the babies will grow to create a new culture. The truth will cause each person to stop these age-old habits and start a culture of using our minds to create a new regime—rooted in reality and principle—a new socialization process.

This socializing includes plural as a basis for every relationship. It includes more than one female uniting, *excluding competing on clothing, hair, food, sexually appealing and sex*, to give a male what is needed for success in taking care of the needs of females and children in a community. All relationships are rooted "in a meeting of the minds" on the needs of all the females and the children in a community. In addition, that the babies develop to know that they are Human who develop into the adult script as Community Agents.

Therefore, adults and /or caregivers agree that females are nurtured as the administrator and governor of all social relationships with males, and that males are reared to have reverence, respect, joy, gratitude, love and appreciation for all females. To do what needs to be done for the improvement of the physical, mental, emotional and financial well being of females and children, whereby the needs are met. Resulting in the male always being responsible and accountable to the "The Sacred Sisterhood Administration" created for accountability and self actualization.

Today, it is time to get out of the past and change the culture in America. The new Science of Humaculture, Sacred Sisterhood is the Key, and the Freedom Remedy are some of the mental tools needed for each individual to mentally applied and demonstrate by action to free themselves from limiting culture affects of the institution of slavery and the institutional acceptance of a superior and inferior class of people.
